# Introduction to DepthVista

DepthVista is a 3D camera based on Time of Flight (TOF) technology, USB Video Class (UVC) compliant, USB 3.2 Gen 1 SuperSpeed USB camera from e-con Systems, a leading Embedded Product Design Services Company which specializes in advanced camera solutions.

DepthVista is an RGB-D camera containing both RGB and TOF depth cameras. RGB camera has 1/2.6" AR0234CS CMOS digital image sensor with global shutter from onsemi™. It has dedicated high performance color image signal processor. TOF depth camera has 1/4" CCD sensor and dedicated depth processor. DepthVista is a two-board solution containing camera board with the USB 3.2 Gen 1 interface and laser board along with enclosure.

This document describes how to build the DepthVista console application step by step on the host PC (Linux).

## Prerequisites

The prerequisites are as follows:

- DepthVista console application source code
- CMake (version 3.5 and above)
- DepthVistaSDK

## Description

DepthVista has USB interface controller with USB Type-C connector to interface with the host PC. It is a ready-to-manufacture camera board with all the necessary firmware built-in and is compatible with the UVC version 1.0 standard. You can integrate this camera into the products, and this helps to cut short the time-to-market.

DepthVista is a UVC compatible and will work with the standard drivers available with Windows and Linux OS. There is no need for any additional driver installation. So, video streaming through UVC is possible without any special drivers on OSes that have built-in support for UVC standards.

**Table 1: DepthVista supported Format, Resolutions, and Frame Rates**

| S.No | Format | Camera Mode | Resolution          | Frame Rate (fps)<br>USB 3.2 Gen 1 |
|------|--------|-------------|---------------------|-----------------------------------|
| 1    | UYVY   | RGB Mode    | 2.3MP (1920 x 1200) | 30                                |
|      |        |             | FHD (1920 x 1080)   | 30                                |
|      |        |             | HD (1280 x 720)     | 60                                |

|   |                        |               |                        |    |
|---|------------------------|---------------|------------------------|----|
|   |                        |               | VGA (640 x 480)        | 60 |
| 2 | Y16<br>(RAW<br>12-bit) | TOF Mode      | Depth (640 x 480)      | 30 |
|   |                        |               | IR (640 x 480)         | 30 |
|   |                        |               | Depth + IR (640 x 960) | 30 |
| 3 |                        | RGB-D<br>Mode | 1280 x 600 (RGB-D)     | 30 |
|   |                        |               | 1443 X 960 (RGB-D)     | 30 |

The TOF camera in DepthVista can be used in two depth modes as follows:

- **Far Mode:** Effective depth range is between 1000 mm to 6000 mm.
- **Near Mode:** Effective depth range is between 200 mm to 1200 mm.

The TOF camera controls of DepthVista are as follows:

- TOF Data Mode
- TOF Depth Range
- TOF Mask
- TOF Gain

The RGB camera controls of DepthVista are as follows:

- Brightness
- Contrast
- Saturation
- Gamma
- Gain
- Sharpness
- White Balance
- Exposure
- Power line frequency

# Installing DepthVistaSDK for Linux

---

This section describes the installation of DepthVistaSDK which is essential for building DepthVista Application.

The steps to install the DepthVistaSDK are as follows:

1. Run the following command to extract the **package** file.

```
unzip -X <packageName.zip>
```

<Extracted Directory>\Linux\Bin\Ubuntu18.04\x64\SDK will have an install.sh file.

**Note:** For Ubuntu 20.04 the install.sh file will be present in <Extracted Directory>\Linux\Bin\Ubuntu20.04\x64\SDK.

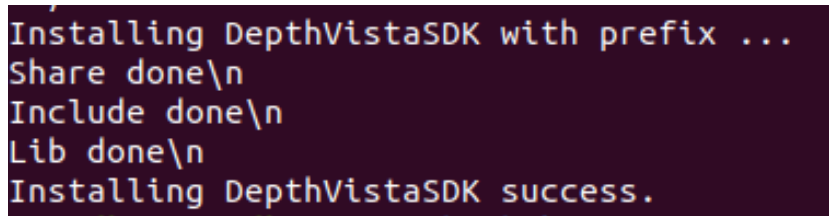

2. Open the folder containing install.sh in terminal.
3. Run the following command to give executable permission for install.sh file.

```
chmod +x install.sh
```

4. Run the following command to install the **DepthVistaSDK**.

```
sudo ./install.sh
```

Once installation is success, **Installation DepthVistaSDK success** message appears.

```
Installing DepthVistaSDK with prefix ...  
Share done\  
Include done\  
Lib done\  
Installing DepthVistaSDK success.
```

Fig 1: Installation success screenshot.

# Building DepthVista Console Application

---

This section will explain about building DepthVista console application.

<Extracted Directory>\linux\Source\CPP\DepthVistaCmd will have the DepthVistaConsoleApp.cpp and a CMakeLists.txt file.

The steps to build DepthVista console application are as follows:

1. Open the folder in terminal.
2. Run the following command to create a build directory and change the terminal to build directory on successful creation of build directory.

```
mkdir build && cd build
```

3. Run the following command to create make file from CMakeLists.txt.

```
cmake ..
```

4. Run the following command to generate DepthVistaConsole executable file using the make file.

```
sudo make
```

Once the make is completed successfully, DepthVistaConsoleApp executable will be generated.

5. Run the following command to run DepthVistaConsole application.

```
sudo ./DepthVistaConsole
```

**Note:** Please refer the *DepthVista\_Console\_Application\_User\_Manual.pdf* provided in the package.

# Troubleshooting

---

**Error: error while loading shared libraries: libdc1394.so.25: cannot open shared object file: No such file or directory**

**Warning: libdc1394.so.25, needed by /usr/lib/libopencv\_world.so.4.2.0, not found**

Run the following command in terminal to solve the issue.

```
sudo apt-get install libdc1394-25
```

# FAQ

---

**1. We have already installed OpenCV version in PC. Will it make conflict with the DepthVista SDK?**

Pre-installed OpenCV version will not make any conflict with DepthVistaSDK, because the libs and header files required by DepthVistaSDK will be added in the installation steps itself.

Since DepthVistaSDK is developed with OpenCV version 4.2.0, make sure any application using DepthVistaSDK also uses OpenCV version 4.2.0.

## **Contact Us**

If you need any support on DepthVista product, please contact us using the Live Chat option available on our website - <https://www.e-consystems.com/>

## **Creating a Ticket**

If you need to create a ticket for any type of issue, please visit the ticketing page on our website - <https://www.e-consystems.com/create-ticket.asp>

## **RMA**

To know about our Return Material Authorization (RMA) policy, please visit the RMA Policy page on our website - <https://www.e-consystems.com/RMA-Policy.asp>

## **General Product Warranty Terms**

To know about our General Product Warranty Terms, please visit the General Warranty Terms page on our website - <https://www.e-consystems.com/warranty.asp>

## Revision History

| Rev | Date              | Description   | Author          |
|-----|-------------------|---|-----------------|
| 1.0 | 06-July-2022      | Initial Draft   | Camera Products |
| 1.1 | 03-September-2022 | Added OpenCV installation steps and changed build steps | Camera Products |
| 1.2 | 02-November-2022  | Added steps in installing DepthVistaSDK                 | Camera Products |
| 1.3 | 04-November-2022  | Removed OpenCV installation steps.                      | Camera Products |
| 1.4 | 02-June-2023      | Added changes   | Camera Products |
| 1.5 | 15-June-2023      | Document Update   | Camera Products |
